

Florin Bighiu

Full Stack Developer

Iasi, Romania | florin.bighiu1@gmail.com | 0748 964 313

www.linkedin.com/in/florin-bighiu | www.florinbighiu.dev | www.github.com/florinbighiu

SUMMARY

Full Stack Developer with 2+ years of hands-on experience building web applications, backed by a 1.5-year intensive bootcamp and real-world delivery in a production environment. Proficient in JavaScript, TypeScript, React, Next.js, Java, and Spring Boot. Passionate about writing clean, maintainable code and shipping products that solve real problems. Eager to contribute technical skills and a proactive approach to a collaborative development team.

WORK EXPERIENCE

AMA R&D GROUPE

Jun 2024 – Present

Web Developer

- Designed and built an internal web app to centralize clinic order tracking, eliminating scattered workflows across multiple platforms and reducing the risk of missed orders
- Digitized physical dental records using advanced scanning technology, improving retrieval speed and data accuracy
- Implemented data validation and quality assurance pipelines, enhancing accuracy and operational efficiency
- Collaborated with medical professionals and team members to resolve discrepancies and maintain order fulfillment timelines

EDUCATION

Full Stack Development Course, Codecool Romania

Dec 2022 – Jun 2024

- Completed an intensive 1.5-year program covering JavaScript, React, Node.js, Java, Spring Boot, and databases
- Developed multiple full-stack applications, implementing best practices in frontend and backend development
- Worked in an Agile environment, participating in sprints, daily stand-ups, and code reviews
- Gained hands-on experience with version control (Git), API development, and database management

Faculty of Electrical Engineering, Iasi

Oct 2017 – Jul 2020

- Completed three years of a four-year program, developing strong problem-solving and analytical skills

- Studied programming fundamentals, algorithms, and data structures
- Took courses in C and C++ for embedded systems and software development

PERSONAL PROJECTS

EcomX

Nov 2023 – May 2024

Full-stack e-commerce platform built with React, Tailwind CSS, Java, and Spring Boot to simulate a modern online shopping experience. Key features include:

- Secure user authentication and registration with Spring Security and JWT
- Administrative product management panel and shopping cart functionality
- Product search and category filtering; contact form with email integration

Momentum

Apr 2024 – Jul 2024

Full-stack task management application designed to streamline productivity for individuals and teams. Key features include:

- Secure multi-tenant authentication with Clerk and organization switching
- Responsive interface across desktop and mobile, built with React and Vite

SWAPI Explorer

2024

MERN stack app integrating the Star Wars API to let users explore characters, ships, and planets — with full CRUD, dynamic search, and a favorites system.

Portfolio Website — florinbighiu.dev

2024 – Present

Personal portfolio built with Next.js 15, React 19, and Tailwind CSS. Features scroll-reveal animations, 3D project card tilt effects, and a working contact form via Resend API. Deployed on Vercel with a custom domain.

SKILLS

Frontend

HTML & CSS, JavaScript, TypeScript, React, Next.js, Tailwind CSS
